Cass. Pen. sez. II , n. 11075 del 19.10.2017 (depositata 13.3.2018). Illecito accesso al sistema informatico da parte di un soggetto abilitato (dipendente) che approfitta dell'ingresso nel sistema per l' estrazione di copia del database e dei codici

sorgente di un programma protetto da copyright. Affronta anche il concetto di "profitto" nell'ambito del reato di cui all'art. 640 ter c.p. precisando che: i codici sorgenti e il contenuto del database di un programma hanno un valore intrinseco suscettibile di valutazione patrimoniale. La Suprema Corte rileva -altresì -che l'impossessamento di un bene immateriale suscettibile di valutazione patrimoniale costituisce un danno, anche quando la persona offesa non sia materialmente in grado di avere contezza dell'illecito impossessamento del bene medesimo.
