SECURITY „MADE IN GERMANY“

IT Security Software Solutions
Giulio Vada, Country Manager

OFFERING SECURITY SOLUTIONS WORLDWIDE

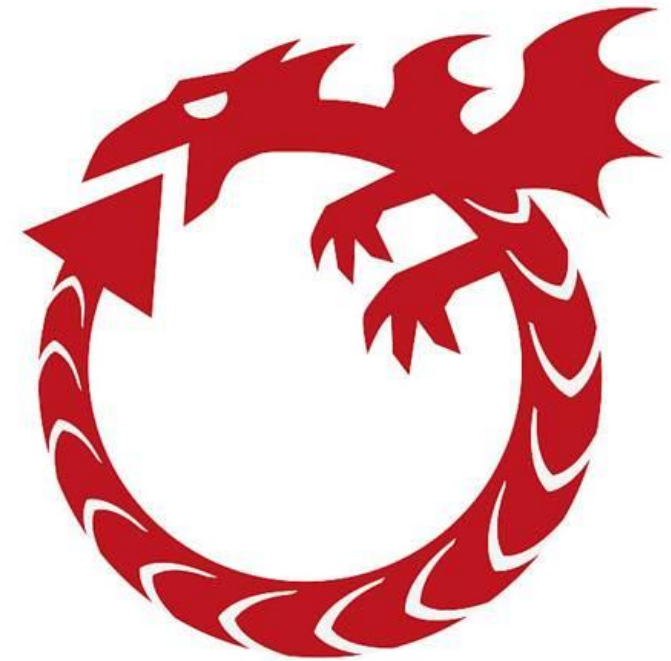

- Founded in Bochum, Germany in 1985
- Global head office & development: Bochum
- Security solutions for home and business
- Solutions available in 90+ countries
- More than 400 employees worldwide
- Subsidiaries in Austria, Belgium, China, France, Germany, Italy, Japan, The Netherlands, Poland, Spain and the United States

TECHNOLOGY BASED ON GERMAN STANDARDS

Continuous research, investigation and analysis to make information technology safe.

- Our SecurityLabs provide unparalleled analysis of and protection from malware, security risks, vulnerabilities and spam
- G DATA SecurityLabs discovers and analyzes highly sophisticated, complex spywares: Uroburos, Petya, Manamecrypt
- Publish a bi-annual Malware Report

G DATA IT SECURITY SOFTWARE SOLUTIONS

FOR HOME

- Perfect protection for computers, laptops, tablets and mobiles, supporting Windows, Mac OS and Android platforms
- Data and identity protection
- High quality protection mechanism against viruses, Trojans, worms, backdoors and all other cyber threats
- Optional modules: backup, child protection, advanced browser protection that avoids any manipulation while online banking

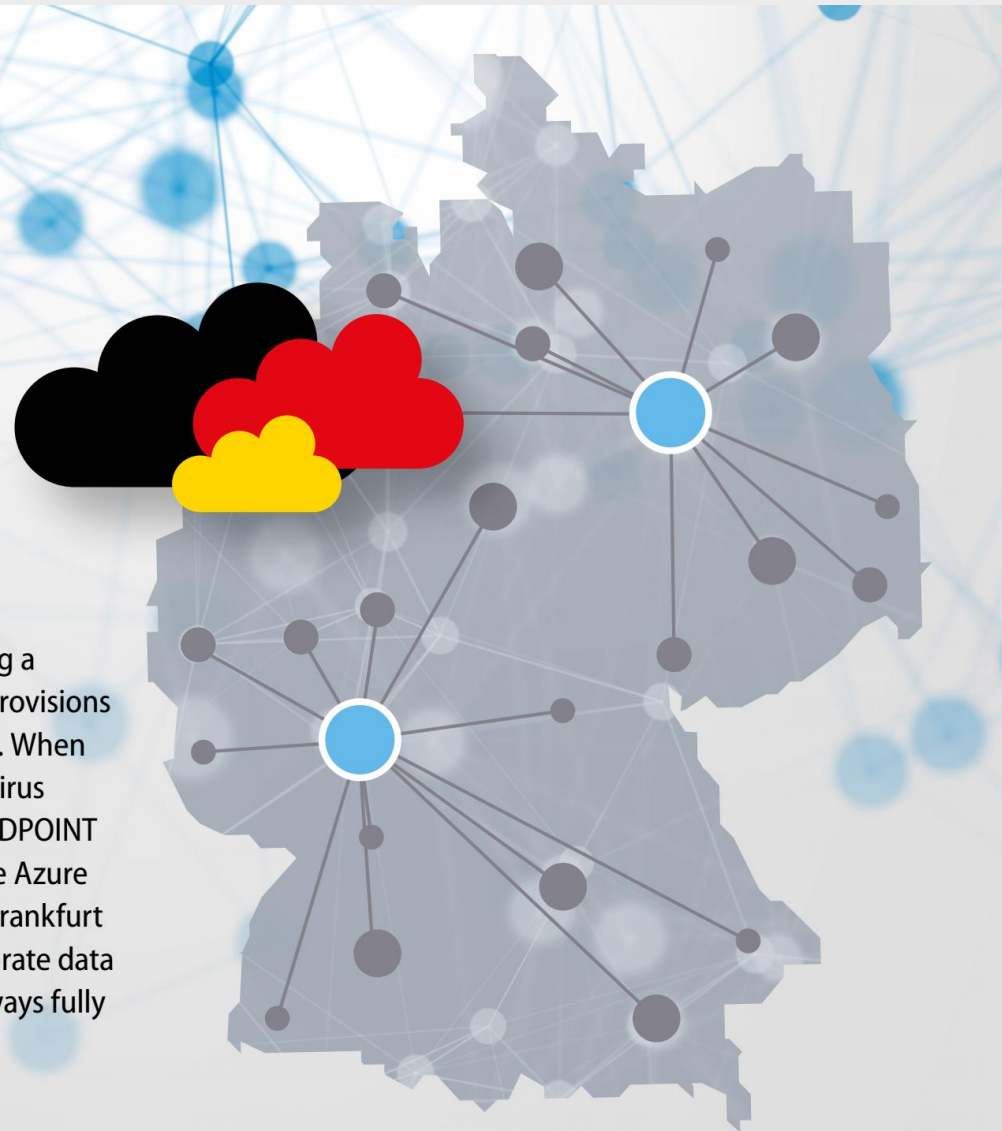

FOR BUSINESS

- Protecting your most important values: your employees and intellectual property - regardless of the size of your company
- Award-winning, globally recognized and proven detection rates and performance
- User-friendly client management allowing a quick and easy start, tailored to your needs
- Optional modules for mail security, backup and patch management

G DATA is a launch partner for Microsoft Cloud in Germany

With the Cloud in Germany, Microsoft is offering a solution that meets the strict data protection provisions and compliance guidelines in force in Germany. When the project starts, G DATA will be the only antivirus provider to be represented, with MANAGED ENDPOINT SECURITY – a solution especially adapted to the Azure architecture. Dedicated data centers set up in Frankfurt and Magdeburg guarantee that sensitive corporate data belonging to our partners and customers is always fully protected against third-party access.

- Organizational and offensive assessment of IT infrastructures

- Security consultants, pen testers, incident response engineers

Malware Analysis

APPROCCIO OLISTICO ALLA SICUREZZA INFORMATICA

- La gestione dei rischi in materia di sicurezza informatica deve essere integrata nel pensiero manageriale dell'azienda.
- Approccio Risk based vs. Compliance based: l'insicurezza è la nuova normalità
- Etica e corporate responsibility

Cutting Edge Technology for Winning Partners

G DATA is IT Security
Partner for Ducati
